Map of seasonal monsoon trade winds on the Indian Ocean: summer winds in red, winter in blue. The route those early Greeks stumbled across had already been used for centuries by sailors traveling between India and East Africa, trading ivory and various metals. As navigators from afar developed a large body of collective knowledge of winds and currents, a complex trading system evolved that ...

Summer Monsoon. The summer monsoon is associated with heavy rainfall. It usually happens between April and September. As winter ends, warm, moist air from the southwest Indian Ocean blows toward countries like India, Sri Lanka, Bangladesh, and Myanmar. The summer monsoon brings a humid climate and torrential rainfall to these areas.

[how it impacts India's monsoon? - The Indian Express](#)

A monsoon system is characterized by a seasonal reversal of prevailing wind directions and by alternating wet and dry seasons. In India the wet season, called the southwest monsoon, occurs from about mid-June to early October, when winds from the Indian Ocean carry moisture-laden...
