Hereditary spherocytosis is an abnormality of red blood cells, or erythrocytes.The disorder is caused by mutations in genes relating to membrane proteins that allow for the erythrocytes to change shape. The abnormal erythrocytes are sphere-shaped (spherocytosis) rather than the normal biconcave disk shaped.Dysfunctional membrane proteins interfere with the cell's ability to be flexible to ...

Acetabular surgery is complicated because of the 3D anatomy of the pelvis and acetabulum, the complex fracture patterns that may be encountered, and the potential for concomitant traumatic injuries . Some authors believe that surgical fracture treatment should be performed only at specialized centers; however, even complex repairs are increasingly being attempted outside such centers (42 , 68).

The road to becoming a neurosurgeon requires hard work but has huge rewards. Not only do neurosurgeons get to improve the lives of their patients, but they also make a very good living – base salaries for a neurosurgeon in their first year is around \$350,000 with top surgeons making over \$900,000. Neurosurgeons specialize in the surgical treatment of nervous system disorders.

SUMMARY Summary: Bacteroides species are significant clinical pathogens and are found in most anaerobic infections, with an associated mortality of more than 19%. The bacteria maintain a complex and generally beneficial relationship with the host when retained in the gut, but when they escape this environment they can cause significant pathology, including bacteremia and abscess formation in ...
